The 'marketing power' of tin packaging

We are proud to present you with the newest edition of our catalogue. Packed with inspiration to give you new ideas on how to package your product in the best possible way.

As you most probably already know, tin packaging has huge commercial advantages. People keep them and they are often given a second life. Therefore, in addition to being a sustainable packaging solution, it means endless 'exposure' of your brand. Did you know that in many countries today, over 95% of tin packages are already being recycled?

Tin packaging can be recycled endlessly, without compromising on quality. We see that tin packaging is widely used for the storage of (food) goods or as a collector's item. Still, even we continue to be amazed by all the possibilities these cans have to offer. We hope you enjoy our new catalogue. Please do not hesitate to contact us if you have any questions. We are happy to advise you!

"Tin packaging never ceases to amaze!"

Team The Box

Introduction of tin packaging

We use thin, special-coated tin to make our cans. For a protective and glossy finish, we apply a strong lacquer to the material. This makes our tin packaging suitable for packing dry foods such as tea, coffee, confectionery and spices. Within our range, we also have aluminium cans, which are suitable for packaging 'wet' products such as cosmetics. Embossing gives the offset-printed cans a neat finish. The result is a rock-solid brand carrier.

Uniquely customised

No marketing expression is stronger than unique, customised packaging. In addition to our range of printed tin cans, at The Box we offer the option of having coffee and tea tins, as well as cake tins and spice packaging, fully customised in the style of your brand. We are happy to advise you on the design of your custom tin packaging.
